

TRADITIONAL LONG RUN STAMPING

Lake Air Companies' metal stamping business is a full service provider of precision metal stampings. We offer capabilities from prototyping services to long-run production and assemblies. We process a full range of metals, both ferrous and non-ferrous, including tough blue tempered steel and spring steel. Our 11 Minster presses will handle 20,000 lb. coils from 32 up to 600 tons of punching with 12 feet in bed length.

We utilize progressive, transfer, stage, and compound dies. Our in-house tool & die shop gives us tight control over tool quality and lead times. We provide valuable design assistance with our knowledgeable and helpful engineering staff. We are constantly making enhancements to our systems to better serve our customers today, and into the future.

Vast experience stamping metals and alloys that include:

- Stainless Steel
- Aluminum
- Copper
- Beryllium copper
- Carbon Steels
- Brass
- Phosphor bronze
