

SHORT RUN METAL STAMPING

Lake Air Companies specializes in customized short run metal stampings that provide our customers with precision, quick turnaround parts at competitive rates. This cost-effective manufacturing process is ideally suited for customers with short lead times, repetitive low to medium volumes and for parts that require modification.

If you are introducing a new product to the market place, short run metal stamping is an excellent means to quickly manufacture the part. As the demand for your product increases and higher volume tooling is necessary, Lake Air Companies can meet your supply demands while new, higher demand tooling is being built.

Lake Air Companies' Account Managers will work with you to select the best suited short run stamping options based on budget, quantity, part complexity and on-going demand.

Lake Air Companies' short run capabilities:

- **16 Punch presses ranging from 45 to 300 ton capacities**
- **Ideal for Prototypes**
- **Test runs - dependent on part qualification**
- **Small to medium runs – from 15 – 20,000**
- **Single short production runs**
- **Low cost tooling**
- **Design change flexibility**

Vast experience stamping metals and alloys that include:

- **Stainless Steel**
- **Carbon Steels**
- **Aluminum**
- **Brass**
- **Copper**
- **Phosphor bronze**
- **Beryllium copper**
