

STRUCTURAL FABRICATION

Lake Air Companies' modern production facility features some of the best heavy fabrication equipment available and a talented, highly-trained staff. Our automated processes and equipment ensure perfect precision for your heavy gauge parts. We cut-to-size, bend, form, weld, assemble, finish, paint and more. From smaller parts from heavy gauge steel to single components the size of a room we have the expertise to provide fabricated parts with tight tolerances you need, no matter how complex the design. We are one of the very few structural steel fabricators that offer true "one stop shop" service.

We work with a wide range of materials in gauges up to 1 inch thick used to manufacture durable, hardworking components for harsh environment applications.

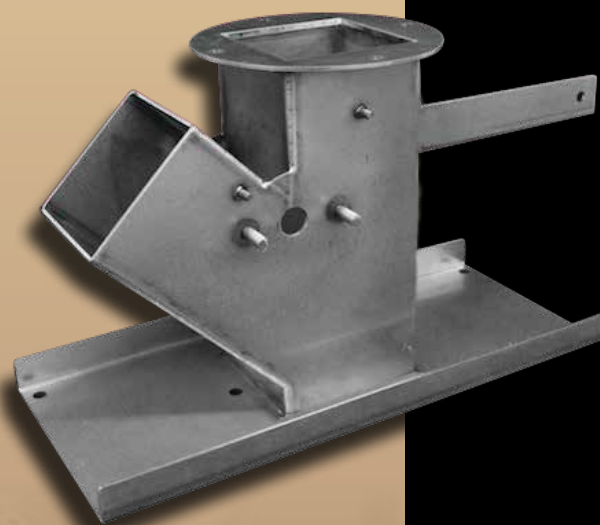

Materials include:

- Mild Steel
- AR Steel
- Tempered and pre-tempered steel
- Stainless steel

Secondary operations include:

- Hardware Insertion
- Drilling
- Riveting
- De-Burring
- Packaging
- Tapping
- Spot and Stud Welding
- Sanding
- Mechanical Straightening

We offer these services individually, or together in any combination your project requires. We will also consider adding new services to meet your unique needs.
